Journal of Pharmacological Methods

Contents

Volume 17

ALEXANDER JAKUBOVIC, DAVINA FU, and HANS C. FIBIGER
Factors Affecting the Stability and Separation of Biogenic Amines and their Metabolites: Simultaneous Measurement by HPLC with Electrochemical Detection 1

ROBERT N. WILLETTE, DEBORAH Y. EVANS, and BRIAN M. DOORLEY
The In Situ Isolated Larynx for Evaluating Peripheral Opiate Receptor Antagonists 15

ARYEH HURWITZ
Multiple Comparisons and Nonparametric Statistical Tests on a Programmable Calculator 27

ANDREA NOLAN, ALEX LIVINGSTON, RONALD MORRIS, and AVRIL WATERMAN
Techniques for Comparison of Thermal and Mechanical Nociceptive Stimuli in the Sheep 39

VIJAYAPAL R. REDDY, WARE R. CHRISTENSON, and WALTER N. PIPER
Extraction and Isolation by High Performance Liquid Chromatography of Uroporphyrin and Coproporphyrin Isomers from Biological Tissues 51

KEVIN C. PREUSS and STEVEN D. WEITMAN
Determination on In Utero Fetal Rat Heart Rate by Ultrasound 59

SABAH H. AKRAWI and PETER J. WEDLUND
Method for Chronic Portal Vein Infusion in Unrestrained Rats 67

C. VAN DER MEER, P. W. VALKENBURG, P. M. SNIJDERS, M. WIJNANS, and P. VAN ECK
A Method for Hemorrhagic Shock in the Rat 75

A. N. PAYNE and G. DE NUCCI
Anaphylaxis in Guinea Pigs Induced by Ovalbumin Aerosol In Vivo and In Vitro Methods 83

Book Review

FRANK ABBOTT
Innovative Approaches in Drug Research
(A. F. Harms, W. TH. Nauta, and R. F. Rekker, eds.) 91

RICHARD H. KENNEDY, TAI AKERA, and THEODORE M. BRODY
The Effect of Stimulation Frequency and Calcium Concentration on Maintenance of Developed Tension in Isolated Heart Muscle Preparations 95

CHARLES E. RUEGG, A. JAY GANDOLFI, RAYMOND B. NAGLE, CARLOS L. KRUMDIECK, and KLAUS BRENDEL
Preparation of Positional Renal Slices for Study of Cell-Specific Toxicity 111

FRANS G. M. RUSSEL, ALFONS C. WOUTERSE, PETER HEKMAN, GERRY J. GRUTTERS, and CEES A. M. VAN GINNEKEN
Quantitative Urine Collection in Renal Clearance Studies in the Dog 125

MICHAEL J. LEW, JOHN LUDBROOK, JILLIAN M. PAVIA, ANTHONY W. QUAIL, and PETER C. RUTTER
Selective Manipulation of Neurohumoral Control of the Cardiac Pacemaker by Drugs Given Intrapericardially 137

ANTHONY S. BASILE and PHIL SKOLNICK
Preservation of "Peripheral" Benzodiazepine Receptors: Differential Effects of Freezing on [^{3}H] Ro 5-4864 and [^{3}H] PK 11195 Binding 149

ANDREW W. HARMAN, LORRETTA E. McCAMISH, and CHRISTINE A. HENRY
Isolation of Hepatocytes from Postnatal Mice 157

JOHAN C. DE JONGSTE, HARRY MONS, ROEL VAN STRIK, IVAN L. BONTA, and KAREL F. KERREBIJN
Comparison of Isometric and Isotonic Responses of Human Small Airway Smooth Muscle In Vitro 165

Brief Communications

SEYMOUR LEVINE and ARTHUR SALTZMAN
A Method for Evaluating Regional Effects of Cytotoxic Drugs on Proliferating Cells in Lymph Nodes 173

JEAN-DENIS ROUILLON, CLAUDE BERNARD, GUY ROBERT, and PIERRE MAGNIN
Oxidation-Reduction Potential Studies: A New Method in Pharmacology Principles, Materials, and Methods 179

S. W. BRIGHTON, IRENE C. DORMEHL, MARYKE DU PLEUSSIS, MARIANNA MAREE
The Effect of an Oral Gold Preparation on the Gastrointestinal Tract Motility in Two Species of Experimental Animals 185

CHARLES S. SWEET, SCOTT E. EMMERT, ANDREA A. SEYMOUR, INEZ I. STABILITO, and LEONARD OPPENHEIMER
Measurement of Cardiac Output in Anesthetized Rats by Dye Dilution Using a Fiberoptic Catheter 189

STELLA R. O'DONNELL, ROBYN A. BRAUN, JULIANNE J. REID, and THERESE WHOLOHAN
A Histological Method for Studying the Effects of Drugs on Mediator-Induced Airway Microvascular Leakage in Rodents 205

LORENZO BEANI, CLEMENTINA BIANCHI, PIETRO MARCHETTI, and SERGIO TANGANELLI
A Simple Integrator to Process the Electroencephalogram of Small Laboratory Animals 219

W. W. MAPLESON
Computation of the Effect of Donnan Equilibrium on pH in Equilibrium Dialysis 231

DAVID A. BRIGHT, ROBERT FALOTICO, and ALFONSO J. TOBIA
Evaluation of Calcium Entry Blockers and alpha$_2$-Adrenergic Antagonists on B-HT 920-Induced Pressor Responses in the Autonomically Blocked Dog 243

MARCY F. PETRINI and TERRY M. DWYER
A Regression Analysis Program to Fit Nonseparable Equations 253

HIRONORI TSUCHIYA, MIKIO TATSUMI, NOBUHIKO TAKAGI, TORU KOIKE, HIDEKI YAMAGUCHI, and TOKISHI HAYASHI
Determination of Catecholamines in Rat Tissues by High-Performance Liquid Chromatography Using a Precolumn Fluorescence Labeling Method 263

MAT J. JONGEN and ANTHONY W. NORMAN
A Simplified Cannulation Procedure for Pharmacokinetic Experiments in Rats 271

FREDERIK ANDREASEN, JØRGEN HESLOP CHRISTENSEN, and BØRGE POULSEN
A Method of Oxygen Supply to a Low Volume Tissue Bath Containing a Protein Solution 277

KATHRYN A. KING, REZA TABRIZCHI, and CATHERINE C. Y. PANG
Investigation of the Central and Peripheral Actions of Clonidine and Methoxamine Using a New In Vivo Rat Preparation 283

T. S. RAO, G. B. BAKER, R. T. COUTTS, J. M. YEUNG, G. J. A. McINTOSH, and G. A. TOROK-BOTH
Analysis of the Antidepressant Phenelzine in Brain Tissue and Urine Using Electron-Capture Gas Chromatography 297

NILS LINDEFORS, ERNST BRODIN, and URBAN UNGERSTEDT
Microdialysis Combined with a Sensitive Radioimmunoassay: A Technique for Studying In Vivo Release of Neuropeptides 305

B.. CHEVALIER, C. MOUAS, P. MANSIER, M.. C. AUMONT, and B. SWYNGHEDAUW
Screening of Inotropic Drugs on Isolated Rat and Guinea Pig Hearts 313

P. M. ELWORTHY
Method for Stimulating the Adrenergic System of an Isolated Perfused Rat Heart 327

LEON AARONS, STEPHEN TOON, and MALCOLM ROWLAND
Validation of Assay Methodology Used in Pharmacokinetic Studies 337

PHILIP SEEMAN
The Absolute Density of Neurotransmitter Receptors in the Brain: Example for Dopamine Receptors 347

SABURO MATSUDA, KENJI KUROKAWA, KATSUMI HIGUCHI, NOBUHIKO IMAMURA, HIROSHI HAKATA, and MOTOHIKO UEDA
A New Blood Pressure Measuring Apparatus Equipped with a Microcomputer System for Conscious Rats 361

Volume 18

HIDEAKI KARAKI
Review Article: Use of Tension Measurements to Delineate the Mode of Action of Vasodilators 1
SAMUEL H. H. CHAN and B. T. ONG
A Simple Experimental Index for the Evaluation of Inotropic Responses 23
J. THOMAS PETERSON and LARISSA A. POHORECKY
An In-Vivo Cumulative Dose-Response Assay of the Myocardial Beta-Adrenoceptor System 31
C. R. GARDNER and V. JAMES
Activity of Some Benzodiazeprine Receptor Ligands with Reduced Sedative and Muscle Relaxant Properties on Stress-Induced Electrocorticogram Arousal in Sleeping Rats 47
J. R. J. BAKER, R. J. HAIGH, G. WARBURTON, A. H. WESTON, AND I. H. M. WILLIAMSON
The Measurement of Drug-Induced Calcium Changes in Vascular Smooth Muscle Using X-Ray Microanalysis of Pyroantimonate Precipitates 55
FRANCIS DEVAUX, PATRICK HERBELIN, FRANÇOISE ACEZAT, and CHRISTINE GOIZEL
A Fully Automated System Using a Microcomputer for the Hypertensive Activity Assays of Drugs in the Anesthetized Rat 69

Brief Communications

PHILIP D. ACOTT, MALCOLM R. OGBORN, and JOHN F. S. CROCKER
Chronic Renal Failure in the Rat 81
L. P. HUDSON, R. J. REIFFENSTEIN, and M. W. WARENYCIA
A Method for Quick and Simple Construction of Push-Pull Cannulae and Their Use in Recovery of Hippocampal Amino Acids 89
N. C. MUIR, J. C. DOXEY, M. E. HAVLER, and J. M. CLIFFORD
The Use of Ex Vivo Platelet Aggregation to Confirm the In Vivo α_2-Adrenoreceptor Antagonist Effect of Idazoxan in Man 95
TOSHIHIKO UEMATSU, YOSHIHARU TAKIGUCHI, ATSUHIRO MIZUNO, KEIZO SOGABE, and MITSUYOSHI NAKASHIMA
Application of Thermography to the Evaluation of the Histamine Skin Test in Man 103
RUSSELL G. CHESS-WILLIAMS and KENNETH J. BROADLEY
Examination of Cardiac Alpha-Adrenoreceptors from Pharmacological Responses and Radioligand Binding: Comparison of Rat and Guinea Pig Tissues 111
ANNETTE WRIGHT, P. RAVAL, R. J. EDEN, and D. A. A. OWEN
Histamine H_1-Receptor Antagonist Activity Assessed in Conscious Dogs 123
DAVID J. DOOLEY and HELMUT BITTIGER
Quantitative Assessment of Central β1- and β2-Adrenoreceptor Regulation Using CGP 20712 A 131
DOUGLAS J. ORMROD, GRACE L. HARRISON, and THOMAS E. MILLER
Inhibition of Neutrophil Myeloperoxidase Activity by Selected Tissues 137
JAMES L. LEWIS, RONALD J. PRUHS, and RAYMOND M. QUOCK
Modification of an Infant Incubator for Exposure of Experimental Animals to Nitrous Oxide 143
IKUO MARUYAMA, CHIEKO YOSHIDA, MAMORU KOBAYASHI, HIDETO OYAMADA, and KAZUTAKA MOMOSE
Preparation of Single Smooth Muscle Cells from Guinea Pig Taenia Coli by Combinations of Purified Collagenase and Papain 151
ROBERT MCALONEY, HASLEY MITCHELL, ARNOLD HENRI DEERING, ROBIN GRAY SHANKS, and DEAN WALTER GEORGE HARRON
Computerized Evaluation of Valsalva's Maneuver Before and During α-Adrenoceptor Blockade with Alfuzosin 163

Brief Communication

TOSHIHIKO UEMATSU, SAMUEL VOZEH, HUY-RIEM HA, FERENC FOLLATH, and MITSUYOSHI NAKASHIMA
Method for Stable Measurement of the Electrocardiogram in Isolated Guinea Pig Heart: Evaluation of the RR-QT Relationship and the Effect of Quinidine 179

ERRATUM 187

L. S. JACKSON and J. E. H. STAFFORD
The Evaluation and Application of a Radioimmunoassay for the Measurement of Diphenoxylic Acid, the Major Metabolite of Diphenoxylate Hydrochloride (Lomotil), in Human Plasma 189

CHRISTOPHER K. ATTERWILL, PETER COLLINS, CAROL G. BROWN, and RACHEL F. HARLAND
The Perchlorate Discharge Test for Examining Thyroid Function in Rats 199

JULIANNE J. REID and GÖRAN DUKER
Recording of Monophasic Action Potentials in the Horizontally Perfused Guinea Pig Heart: An In Vitro Method to Study Drug-Induced Changes in Cardiac Electrophysiology 205

CHARLES H. V. HOYLE
A Modified Single Sucrose Gap: Junction Potentials and Electronic Potentials in Gastrointestinal Smooth Muscles 219

W. J. F. SWEATMAN, D. R. BRANDON, S. CRANSTONE, R. GOODERHAM, and J. R. WALKER
Indium-111-Radiolabled Guinea Pig Peripheral Leukocytes: In Vivo Distribution and Response to Leukotriene B_4 227

MAIKEL RAGHOEBAR, JAN A. M. HUISMAN, WIM B. VAN DEN BERG, and CEES A. M. VAN GINNEKEN
An In Vitro Approach to Study Cellular Kinetics of Drugs 239

J. CORTIJO, J. S. DIXON, and R. C. SMALL
Influence of Some Variables in the Triton X-100 Method of Skinning the Plasmalemmal Membrane from Guinea Pig Trachealis Muscle 253

MICHAEL R. LEWIS, JOEL P. GALLAGHER, and PATRICIA SHINNICK-GALLAGHER
An In Vitro Brain Slice Preparation to Study the Pharmacology of Central Vestibular Neurons 267

LAURENCE B. KATZ, ROSALIND A. SCHOOF, and DAVID A. SHRIVER
Use of a Five-Day test to Predict the Long-Term Effects of Gastric Antisecretory Agents on Serum Gastrin in Rats 275

J. H.-Y. LI and S. T. KAU
Amphibian Cornea as a Model for Studying Intrinsic Activities of Loop Diurectics 283

STEVEN A. SILBAUGH, PETER W. STENGEL, ROBERT D. DILLARD, and KERRY G. BEMIS
Pulmonary Gas Trapping in the Guinea Pig and its Application in Pharmacological Testing 295

DAVID A. WARLTIER, KATHRYN A. LAMPING, LORIE R. PELC, and GARRETT J. GROSS
A Canine Model of Thrombin-Induced Coronary Artery Thrombosis: Effects of Intracoronary Streptokinase on Regional Blood Flow, Contractile Function, and Infarct Size 305

MARK C. HEIT and WAYNE S. SCHWARK
An Efficient Method for Time Course Studies of Antiepileptic Drugs Using the Kindled Rat Seizure Model 319

NAOHIKO TAMURA, DEVENDRA K. AGRAWAL, and ROBERT G. TOWNLEY
A Specific Radioreceptor Assay for Leukotriene C_4 and the Measurement of Calcium Ionophore-Induced Leukotriene C_4 Production From Human Leukocytes 327

CARINE P. DELLO, FRANS M. BELPAIRE, JOS A. KINT, and NORBERT H. FRAEYMAN
Dog Alpha-1-Acid Glycoprotein: Purification and Biochemical Characterization 335

STEFAN R. KOWALSKI, GEOFFREY K. GOURLAY, DAVID A. CHERRY, and COLIN F. McLEAN
Sensitive Gas Liquid Chromatography Method for the Determination of Fentanyl Concentrations in Blood 347

Author Index 357

Subject Index 359
